<div>6.職務内容 Duties: Works on specific drydocking and related naval architectural engineering assignments. Assists Dockmaster in making stability and buoyancy calculations and developing data for launching, drydocking, loading and operation of ships in a safe, efficient and economical manner. Plans and executes drydocking evolution which requires application of a number of standard architectural engineering principles, methods and practices. Reviews docking reports, block designs and other technical data in detail for accuracy. Develops safe and effective procedures by obtaining related drawings and technical directives to verify restraints of structure and stability, in case of drydocking a vessel having structural damage. Compiles diver’s reports and inspection data, designs of safe and effective block/shore arrangement, considers ship’s bearing/knuckling stress, dimensions, scope of work and facility conditions in order to accommodate the ship in a drydock with the best conditions for the repair work. Provides/prepares various technical materials, block layout sheets, tide and stability calculations based on liquid load and weight changes, by making reference to docking plan, damage control book and technical manuals. Compiles docking reports gathering data from shops and contractors. Provides shop personnel with necessary guidance to set blocks and visits dockside to insure that blocks are build conforming to the plan. Assists the Docking Officer and Dockmaster during drydocking, undocking and wetberthing evolutions at the assigned position. Checks bottom of the vessel of blocks and shores to provide guidance to adjust/modify the blocks. Develops necessary drawings for maintenance of dock facilities. Performs other related/incidental duties as assigned.</div>		
<div>7.資格要件／身体条件 Qualification / Physical Requirements a. One year of specialized technical or administrative work experience equivalent at 1-6 level in the related work. If applicant does not have such specialized experience, possession of Doctorate Degree in accredited Graduate School in a related field may qualify him/her at 1-7 level. b. Must be a college or university graduate with specialized education in naval architectural engineering field, or possess an official engineering license in a related field. c. Knowledge of professional engineering concepts, principles, methods, practices in the naval architectural field to perform docking operations. d. Ability to plan, develop, design, review the whole aspects of docking procedures. e. Ability to speak, read and write English at exceptional proficiency level (LAD-4). * An applicant who does not fully meet the qualification requirements stated above may be hired at a lower grade level. 1-6: a. One year of specialized technical or administrative work experience equivalent at 1-5 level in the related work. If applicant does not have such specialized experience, possession of Master’s Degree in a related field may qualify him/her at 1-6 level. / b. Must be a college or university graduate with specialized education in naval architectural engineering field, or possess an official engineering license in a related field. 1-5: a. One year of clerical, technical, or administrative work experience equivalent at 1-4 level in the related work. If applicant does not have such work experience, completion of 4-years college/university in a related field may qualify him/her at 1-5 level. / b. Must be a college or university graduate with specialized education in naval architectural engineering field, or possess an official engineering license in a related field. * A handicapped applicant may be accepted, depending upon the degree and kind of disability.</div>		
<div>英語力 English Language Proficiency : <input type="checkbox"/> 必要なし None <input type="checkbox"/> 初級 Basic <input type="checkbox"/> 中級 Intermediate <input type="checkbox"/> 上級 Advanced <input checked="" type="checkbox"/> 特段の能力 Exceptional</div>		
<div>学歴 Educational Background : N/A</div> <div>免許証／修了証 License/Certificate Required : See block 7 &amp; 8</div>
